

About Our Company

Since Pallet Chief's inception in 1990, our company has helped thousands of businesses in over 40 countries elevate their pallet production by providing a range of quality machines to operations of all sizes.

Throughout our 30+ years of experience in designing & innovating pallet machinery, we have worked hard to make equipment that fits the needs of both large facilities with established production lines and new entrepreneurs looking to start their own homegrown pallet business.

We pride our machines on being *reliable workhorses* that **don't** require years of expertise to operate & maintain.

World-Class Pallet Machinery

**SIMPLE TO OPERATE
EASY TO MAINTAIN
QUICKEST ROI IN THE INDUSTRY**

Pallet Chief IV

**Deluxe Stacker
Included**

Pallet Chief IV

Featured Machines

PC II

The PC II remains our #1 seller and the easiest machine to recommend because of its simplicity, versatility, and price. Virtually maintenance free and one of the easiest machines in the industry to operate.

PC III

Slightly more automated, the PC III relieves the operator's job of pulling the gantry back and forth and produces more consistent pallets while reducing operator fatigue.

PC IV/PC IV GMA

The most automated solution in our standard lineup, the PC IV includes two nailing stations with deckboard feeders (GMA has dual feeders), a pallet flipper, and a Deluxe Stacker with an accumulation table to offer the most streamlined approach to building pallets.

Sod/Skid Machine

Ideal for any Sod Farm application, the Sod Skid Machine provides automated nailing, deckboard placement, and a nester-stacker that flips every other pallet to make each stack as compact as possible.

PC IV GMA Featuring Dual Board Feeders

PC IV DUAL BOARD FEEDER

The simplicity of our entire line of pallet equipment extends to the all new and unique Pallet Chief IV GMA. It is designed specifically for the production of the popular "GMA" style pallets for higher production numbers without sacrificing product quality. Like the standard Pallet Chief IV, the unique PCIV GMA pallet machine is fully automated, which minimizes operator fatigue including the placement of 2 different sizes of deck boards. Call us for information.

We will work with you to deliver the best machinery that suits your needs.

Why Choose Us

1

Responsive

Best Lead Times
Best After Sales Service

2

Innovative

Custom and oversize machines are our specialty

3

Highest Quality

100% American Made!
Machines You Can Trust

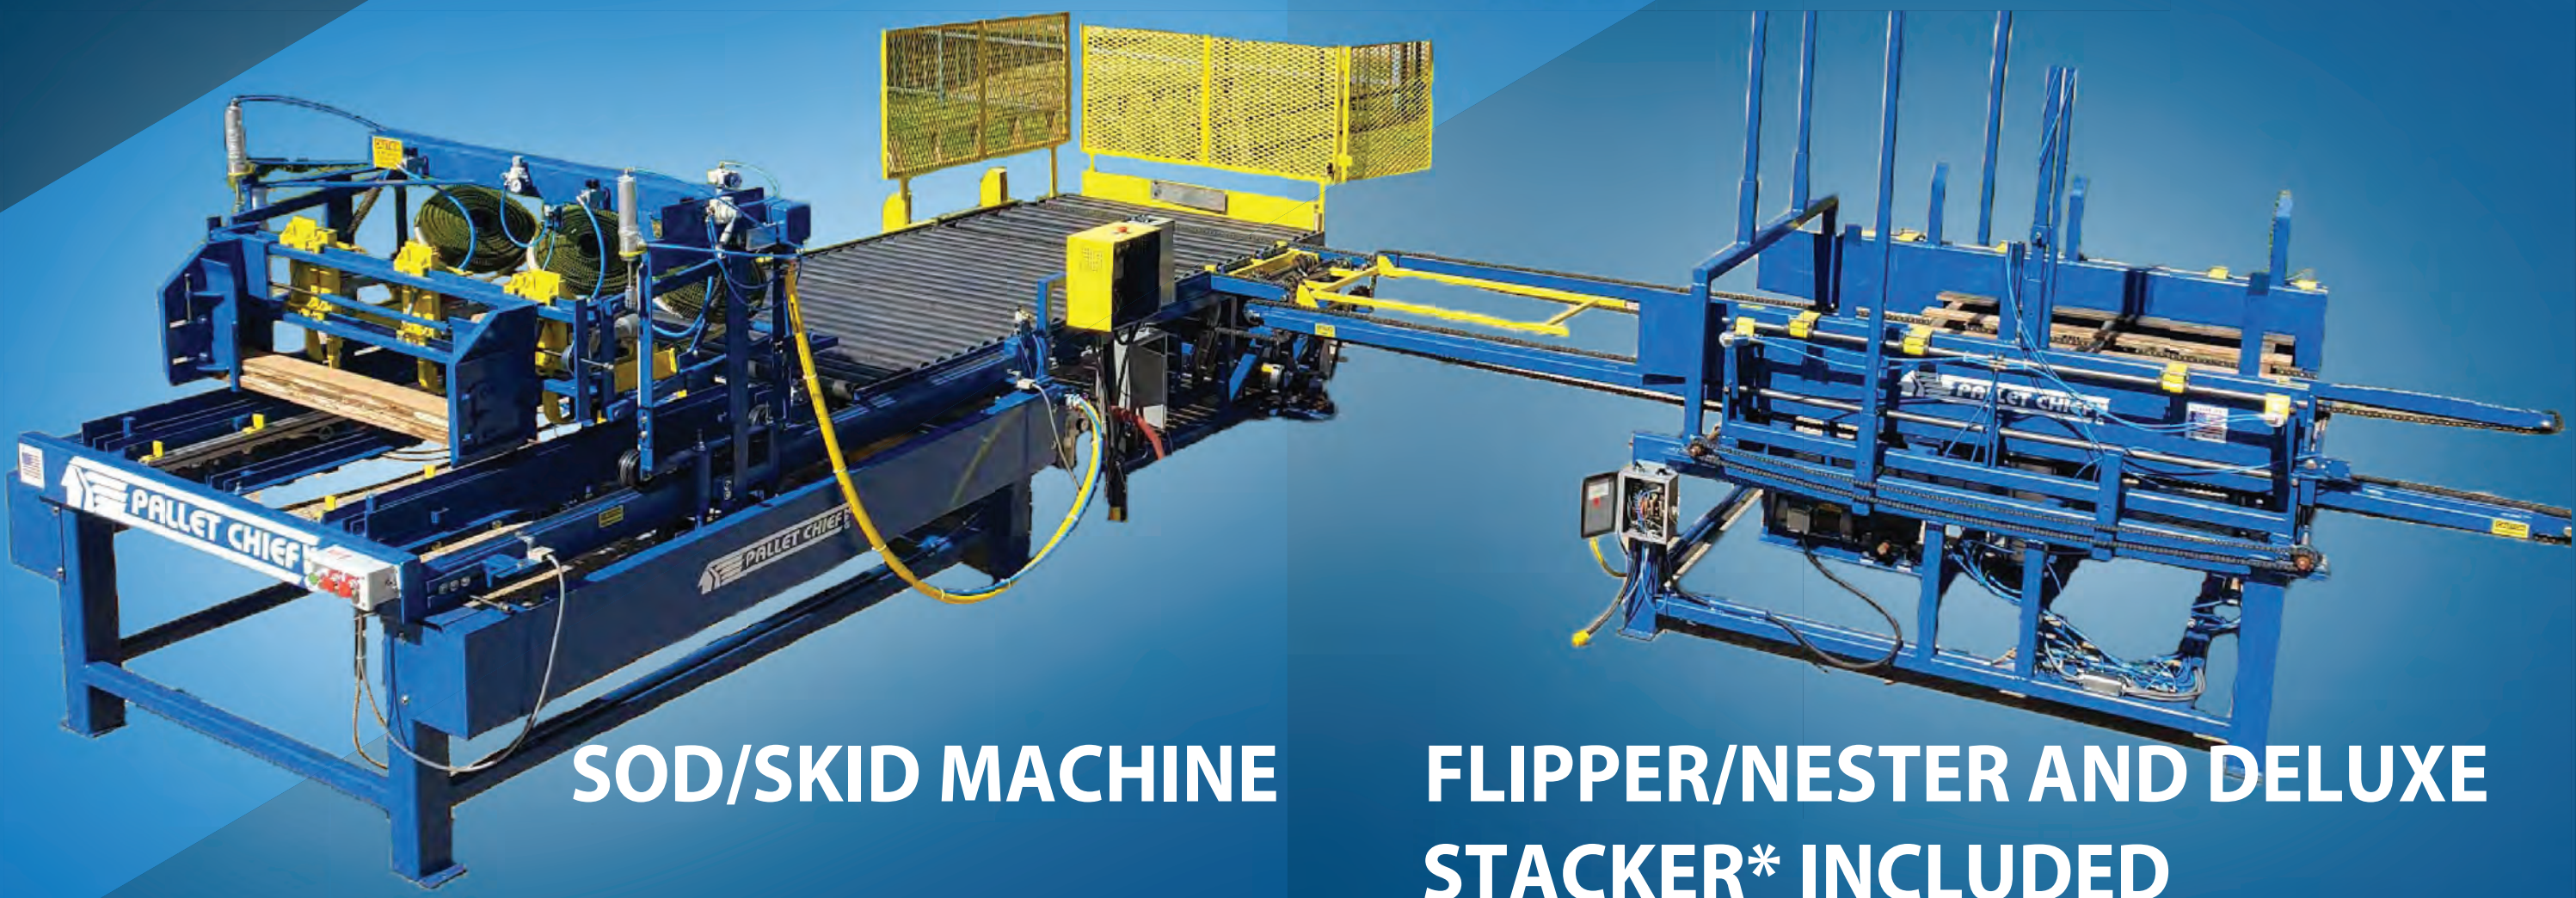

Pallet Chief III Deluxe Stacker* Included

"We take good care of our machines and, in four years, have had no maintenance problems. I know of no other machine that will build uniform, quality pallets with recycled wood as well as the Pallet Chief II."

**-Joe Chesney
